Modelling and Simulation (M&S):

A CCOE Point Paper

Mission Statement:

CCOE is committed to equip practitioners with a CIMIC toolbox. CIMIC Modelling and Simulation (M&S) advances the use of innovative approaches and tools in order to simulate complex security challenges in a realistic way for experimentation, education, training and exercises.

Objectives:

- Make scenarios more realistic by adding the individual and societal resilience factor into the interaction with the population;
- Develop the competences of critical and creative thinking for problem-solving and countering challenges which require attitude change;
- Provide a test-bed for conceptual developments;
- Design table-top simulations of current challenges facing NATO to recognize different courses of action;
- Introduce CIMIC elements into Computer Assisted Exercises (CAX).

Timeline:

Phased implementation of CIMIC Modelling and Simulation is scheduled for the 2017- 2021 timeframe led by CCOE.

Additional Information:

Further enquiries regarding CIMIC M&S project can be addressed to:
